SUMMARY OF INFORMATION

The target is a structure that sits alone in an open area (see sketch #1). I had the feeling of being in a very open barren area, yet I was surrounded by huge built-up structures all around me. These built-up areas were in the distance and I could not clearly make them out. The structure was itself very plain and simple.

The activity inside the structure was several individuals sitting in front of screens or windows (see sketch #2). They were watching, talking, directing. They wore what looked like white shirts and talked through microphones. There were moments of excitement or interest and then moments of boredom.
